PROFILE

Results-driven Software Developer with 3.5 years of experience in designing, developing, and deploying innovative software solutions. Proficient in a range of programming languages and frameworks, including [PHP, Laravel, JavaScript, ReactJs, WordPress, MySQL], and experienced in full software development lifecycle (SDLC) methodologies. Passionate about creating efficient, user-friendly applications and leveraging the latest technologies to solve complex problems. Excellent collaborator with strong communication skills, committed to delivering high-quality work on time.

Achievements

- **E-Commerce Platform:** Built a fully functional e-commerce website using WordPress, implementing features such as user authentication, payment processing, and product management. **Link:** <https://staging.dsta.online/>
- **Loan Application Platform:** Collaborated with a friend to build a fully functional cashloan website using PHP(Laravel) and ReactJs, implementing features such as user authentication, loan application, loan approval and client referral. **Link:** <https://www.co-lenders.com/>
- **Energy services company website:** Developed a responsive client website showcasing their services, using WordPress and Elementor. **Link:** <https://staging.nambaza.com/>
- **IT company website:** Developed a responsive client website showcasing their services, using WordPress by building a theme from scratch. **Link:** <https://komesho.whitespace-tech.com/>

EXPERIENCE

Software Developer (Full Stack)

📅 Mar 2023 - Sep 2024

Nikkle | Ongwediva, Namibia

- As a software developer at Nikkle, I work with the team to develop, test and design the nikkle software platform. The system uses a combination of different languages (PHP, Laravel, jQuery, JavaScript, HTML, CSS, Tailwindcss and Bootstrap).

Freelance Freelancer

📅 Apr 2021 - Present

Immanuel Ntjamba

- Develop websites according to the client's specifications. This involves creating layouts, selecting colors and fonts, and coding the website using programming languages such as HTML, CSS, JavaScript, and backend technologies like PHP and Laravel or CMS like WordPress.

EDUCATION

Bachelor of Science, Computer, Electronics, Engineering

📅 2021

University of Namibia | Ongwediva, Namibia

- Bachelor of Science from University of Namibia
